

IMRAN UDDIN CHOWDHURY

Frontend Developer with React

ABOUT ME

Hi, I'm Imran Uddin Chowdhury. I'm a Frontend Developer with React. I love to create fully functional beautiful and attractive-looking website with cool animations and designs with the latest technologies. I have been working in this field since 2021. I have developed 25+ websites. In work, my major priority is the client's requirements and their satisfaction.

Ecommerce Site Design for a local client
Convert a PSD to HTML for a E-commerce.
It was a responsive website for major three devices such as Mobile, Tab and Desktop. I did use jquery plugin in this website for some animation such as slider, counter up, counter down etc.

Looking for an opportunity to work with a learning environment where I can take my skill to the next level and make a contribution for company.
